## WRITING TASK 1
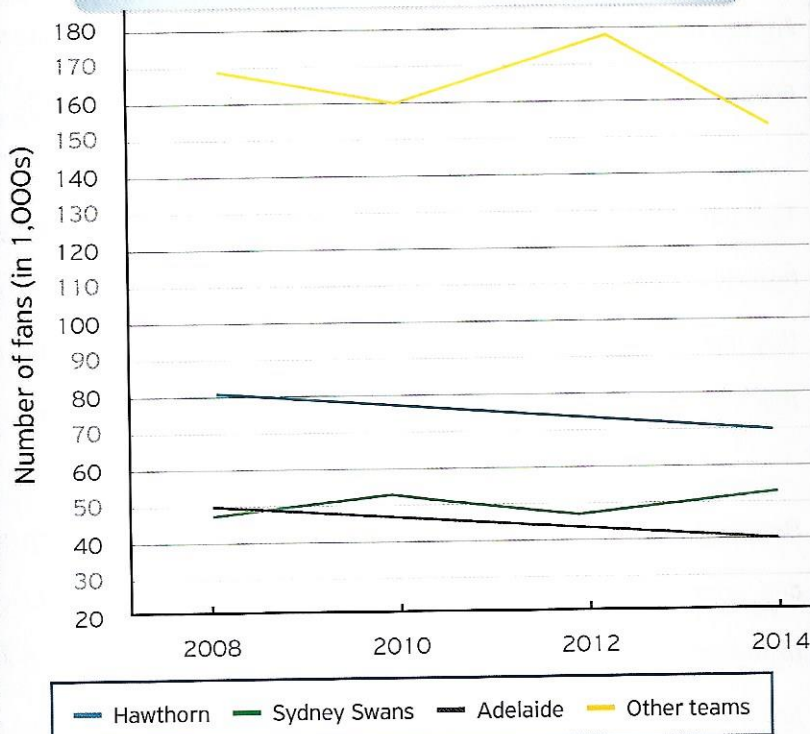

u should spend about 20 minutes on this task.

e pie chart below gives information about the amount of revenue generated by three football clubs in Australia.
e line graph gives information about the attendance of fans at Australian football matches.
mmarise the information by selecting and reporting the main features and make comparisons where relevant.
u should write at least 150 words.

Revenue from Football Clubs in Australia 2008 -2014

- Hawthorn
- Adelaide
- Sydney Swans
- Other teams

Fans attending Australian football matches

- Hawthorn
- Sydney Swans
- Adelaide
- Other teams

he chart and graph above show how much money was made by football clubs in Australia from 2008 to 2014, as well as ttendance figures for fans in the same period.

he three clubs about which we are given information are Hawthorn, the most profitable club, with 20% of the total revenue, s well as the Sydney Swans and Adelaide, each of which brought in 15% of total revenue. These three clubs accounted for half f all revenue from football clubs during this period.

s far as attendance figures are concerned, the popularity of Hawthorn was the highest, with about 80,000 fans in 2008, but his number decreased gradually, reaching 70,000 in 2014. The Sydney Swans had just under 50,000 fans in 2008, a number hich fluctuated and ultimately increased to just over 50,000 in 2014. Like Hawthorn, Adelaide also showed a decrease in its umber of fans, going from 50,000 in 2008 to 40,000 in 2014. The number of fans of all the other clubs fluctuated, starting t approximately 170,000 in 2008, declining to 160,000 in 2010, then rising again to almost 180,000 in 2012, before alling to well under 160,000 in 2014.

o conclude, Hawthorn was the leading football club in Australia, both in terms of revenue and number of fans, though its opularity decreased slightly between 2008 and 2014.
